THE UK HEALTHCARE CHALLENGE

Accessing Care Should Not Be Hard

Many people across the UK are struggling to access timely, high-quality primary care. The system is under unprecedented pressure – and patients are paying the price. Bloom Health was built to change that.

GP Waiting Times Are Getting Worse

Average wait times for a GP appointment in England now exceed two weeks. For urgent concerns, patients face days of phone queues, only to be offered telephone-only consultations.

A&E Is Not the Answer

With GP access limited, millions of patients are attending A&E for conditions that should be managed in primary care – adding strain to emergency services and exposing patients to lengthy waits in high-pressure environments.

Healthcare Stops at 6 PM

Most GP surgeries close by early evening. If you become unwell outside of hours, your options are 111, A&E, or to wait until the next morning – sometimes the next available appointment, days away

Referrals, Gatekeeping & Delays

Specialist consultations through the NHS can involve referral waits of months. Patients are caught in a cycle of re-appointments, referral letters, and NHS backlogs before seeing the right clinician.

**Private Healthcare Is Perceived
As Expensive**

Many people assume private healthcare is out of reach. The result? They delay seeking care, symptoms worsen, and what could have been a simple consultation becomes a complex problem.

Continuity of Care Is Broken

Patients rarely see the same GP twice. Without a consistent clinical relationship, important health context is lost, conditions go unmanaged, and patients feel unsupported.

BLOOM HEALTH MEMBERSHIP IS THE SOLUTION

WHAT WE BELIVE

Healthcare That Blooms Around You

We founded Bloom Health with one belief: that high-quality, compassionate healthcare should be accessible to everyone – not just those who can navigate a broken system. Milton Keynes deserves better. You deserve better.
